Breach Rate % by Reassignment Category

SLA Breached by category

Average Resolution Hours by Reassignment Category

KEY INSIGHT:Incidents with zero reassignments breach SLA only 22% of the time and resolve in 94 hours on average. With 6+ reassignments breach rate reaches 92% and resolution time exceeds 440 hours — a 4x increase. Category 46 generates the highest breach volume, entirely driven by P3 Moderate incidents. Routing failure and category-specific process gaps are the primary controllable drivers of SLA non-compliance.
